

## Photographing Birds in Flight – Handheld Philosophy By Jim Neiger – [www.flightschoolofphotography.com](http://www.flightschoolofphotography.com)

### **Pros**

- .Range of motion
- .Speed
- .Flexibility
- .Change angle
- .Setup
- .Mobility
- .Travel light

### **Cons**

- .Long exposures
- .Using flash, etc
- .Setup shots
- .HDR images
- .Panoramic images

## Photographing Birds in Flight – Exposure

### **Manual exposure mode**

- .Three Knobs –Aperture, Shutter Speed, ISO
- .Meter is the same as in AV mode
- .A must for changing backgrounds
- .Increases awareness of light
- .More control

## Photographing Birds in Flight – Exposure

### **Metering and Compensation**

- .In camera or incident meter?
- .Using a constant as a base point
- .Comparing and compensating (Common sense, Experience)
- .Light & compensation
- .Expose for the subject
